

26th Annual

**MILK RIVER
ANGUS**

Bull Sale

Selling 65 Yearling Angus Bulls

APRIL 20, 2022

AnnieOPhotos

1040 North Fork Road • Chinook, MT 59523

www.milkriverangus.com

WELCOME to the 26th annual Milk River Angus Sale!

Returning consignors include Dale Hofeldt with DH Angus, Ross & Bruce Christofferson with C-Angus, Kent Pike with 4 Buttes Cattle Company, Bryan Pike with Pike Cattle, and Scott, Fay, Kade, Shane & Morgan Friede with North Fork Angus. New consignor this year is Simenson Cattle with Justin, Tomi, Wylee and Wacee Simenson.

Marv and Patty Cross with Top Notch Angus have retired from the Angus business, but have contributed greatly behind the scenes for this year's sale. Their generosity, dedication and passion for the cattle industry is unmatched and greatly respected.

We have an impressive, uniform set of bulls that have been fed out and taken care of at Hould Bull Development Center. Dr. Brock Aiton performed fertility testing, and Sonja Gregory completed ultrasounding. We are grateful for their services.

We continue to be optimistic about the upcoming breeding season, because that's what we need to do. We bring high-performing, low-maintenance bulls that we have confidence in to cover your cows and continue performing in your programs.

To our return customers, thank you for your trust and support of our seedstock programs—we value your support. For those who are new to our sale, we welcome you and hope you'll reach out to us with questions or for additional background information on our bulls.

Please visit the bulls at Hould Feedlot and we hope to see you at our pre-sale social and bull viewing on the 19th at Bear Paw Livestock in Chinook. If you can't be in person on April 20th, bid with confidence online through Frontier Live.

We are certain that our bulls will love your cows!

"YOUR SOURCE FOR BULLS ON THE HI-LINE"

MILK RIVER ANGUS

26TH ANNUAL SALE

Wednesday April 20, 2022

Bear Paw Livestock • Chinook, Montana

Lunch at 11:30 • Sale at 1:00

Selling...65 Yearling Angus Bulls

Sight Unseen Purchase Guarantee

If you cannot attend the sale you have options to place your bid:

- Bid on-line through Frontier Live. (See instructions on this page)
- Leave your bid(s) with any of the fieldmen, auctioneer or consignors.

We will make every effort to purchase a bull for you that will fit your budget and needs. If you are not satisfied upon delivery you don't own the bull(s).

Health & Performance

All bulls sell with complete performance test information including scrotal measurements and ultrasound data. The bulls have been given a breeding soundness and fertility exam by Dr. Brock Aiton. Ultrasound evaluation by Sonja Gregory, AAA certified technician. All bulls have received Fusoguard (Footrot vaccine), Pyramid MLV 5, Inforce 3, 7 way with somnus booster, Safeguard wormer, pour on and have tested negative for BVD.

Genomic Enhanced EPDs

All bulls have been DNA tested for parentage. Numerous bulls have been HD50K tested to increase EPD accuracies and predictability. Look for the HD50K symbol on the pedigrees of those bulls. EPDs are current as of 3/25/2022. Updated EPDs at Angus.org

Insurance

First year loss of use and mortality insurance will be available after the sale through Stockmans Insurance Agency, LLC. A representative will be available after the sale if you choose to insure your purchases. The Milk River Angus consignors will pay half of the premium. See page 6 for further information.

Retained Interest

Sellers are reserving 1/3 revenue sharing interest on all bulls. Natural use and salvage belongs to the buyer. If the seller chooses to collect semen from a bull that you have purchased, it will be done at your convenience and the seller's expense.

Terms and Conditions

All cattle sell according to the standard terms and conditions of the American Angus Association.

Delivery/Hauling Rebates

Free delivery in Montana and at cost outside of Montana. \$50 rebate on every bull you take home the day of the sale.

Sale Order

Sale order has been picked by each consignor.

Videos

Videos of the bulls can be seen on the Milk River website www.milkriverangus.com or www.frontierlivesale.com.

Paxton was the 2nd high-selling bull from the 2017 Milk River Angus Sale. He combines two great maternal sires, Game Day 449 and OCC Paxton 730P. Paxton's dam by Game Day is a tremendous cow. She is highly productive, structurally flawless, and extremely docile. Paxton's calves come very easy with great vigor.

Sons sell as lots 8, 9, 10.

R44 Emulation 7756 was the high selling bull in the 2018 Milk River sale. Full brother sold in the 2019 sale to Bar JV Angus and Regency Acres of Sidney, MT. His dam is a beautifully made OCC Emblazon daughter that calved AI this year at 15 years of age (WR-13 calves @ 106). He is extremely long, ample muscle, and has a quiet disposition. His daughters have been a treat to calve. He has crossed very well on the Paxton cattle.

Sons sell as lots 11, 12, 13, 14.

The all-time Top Yearling Weight sire ever produced at Jorgensen land & Cattle, "Encore" was the Co-Top Selling Bull of his calf crop at \$35,000. His individual AHIR ratios were incredible: BW 94, WW 123, YW, 125, and ADG 128. His calves are born easily and then express tremendous growth; they have earned him progeny ratios of BW 97, WW 102, YW 103. Encore daughters have been calving since 2019 and make nice, broody, productive cows. Encore has a gentle disposition, calving ease, growth, and great daughters. His EPDs rank as follows: Top 10% CED, Top 10% BW, top 20% YW, top 3% CEM, top 30% Milk, top 25% CW, top 35% Marb, top 25% \$B.

Sons sell as lots 50, 51, 52, 53.

Cooper is a forage only developed bull with an outstanding set of females behind him. Tremendous calving ease built into this Cooper bull. We selected him to add more moderate, functioning females to our herd. If you like cows that last and do what they are supposed to do while not eating you out of house and home, check out the Cooper sons. The daughters are no fuss cows. They have just the right amount of fleshing ability.

Sons sell as lots 59, 60, 61, 62.

This bull goes back to Shane's Miss Charlo 502. A maternal brother to the dam of this bull is still in production at the Spearhead Cattle Co. ranch and looks tremendous. Expect exceptional females. You will hear me say that often about the bulls we are offering in this sale. There is not a bull here that we would not hesitate to use back in our own herd. If you are looking for a volume number of bulls I can't think of a better selection than these three 4223 sons we are offering - 56, 57, and 58-- a can't-miss set of bulls.

This bull is out of a Bruno daughter that goes back to our C07 and Z61 cows (a couple of my favorites). The females in the top and bottom of this pedigree have the just-right fleshing ability it takes for a cow to last and bring in big calves, year after year without breaking the bank.

The 685 cow is one of the most noticed cows in our herd from those who come to look at our cows. If you like a less-than moderate female with ease of fleshing ability, lots of volume and thickness plus maternal strength - then this bull is for you. Excellent females on top and bottom of pedigree. Will be an exceptional heifer bull.

The dam G833 to this bull is out the Ideal 6567 bull. This sire was a favorite of mine the first time I saw him on the E7 angus ranch. A rugged-looking bull with lots of volume and thickness in a moderate package. This GE53 son should produce slightly larger, easy-fleshing females and growthy-type steers.

Introducing Anthony!! You can't miss this guy when you walk in the pen. Lots of mass, volume, and internal dimension all wrapped up in an incredible free moving, smooth package. Cow bull out of a larger framed two-year-old dam. Stevenson Declaration, maternal grandsire, is a multiple trait leader for calving ease, performance and \$values. Anthony's sire, Mohnen Homeraised, has a balanced EPD profile, and his strengths lie in calving ease and cow making. Homeraised also has great foot structure. Anthony will leave you with keeper females and the kind of steers that will top the market. Lot 68 ranks in the top 4% for YW, \$F. Top 10% for WW, top 20% for milk, \$W, claw. Top 25% SC, \$B.

Grand Champion Breeding Project, 2020 Blaine County Fair

Door Prizes

Bull Buyers stick around after the sale for a chance to win some fabulous door prizes, including a bronze by the late Bridger Bronze co-owner and artist Harvey Rattey, and a rope creation by Suzie Oxarart of Ropes by Suzie.

At the end of the sale, a lot number will be drawn and whoever purchased that lot will be the lucky winner of these nice door prizes!

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

MANAGEMENT

Dockity (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockity in a sire's offspring compared to another sire.

Claw Set (Claw), is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

Foot Angle (Angle), is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

Maternal Weaned Calf Value (SM), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving dockity, foot structure and fertility while maintaining weaning weights consistent with current production.

Weaned Calf Value (SW), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

Cow Energy Value (SEN), is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

Feedlot Value (SF), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

Grid Value (SG), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (SB), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (SC), an index, expressed in dollars per head, includes all traits that make up both SM and SB with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

CALVING SUPPLEMENTS

Last trimester and calving to breed-back interval is the most critical time for cow nutrition.

Vitamin and mineral supplement support:

- ✓ *Reduced calving problems*
- ✓ *Newborn calf vigor*
- ✓ *Improved colostrum quality*
- ✓ *Overall calf health*
- ✓ *Improved breed-back*

we offer the following:

Crystalyx - molasses based lick tubs containing protein and vitamin and mineral package.

Beef Pro - available in molasses bio-barrel tubs, 33# blocks, or granular. Contains biuret for balanced protein release. 35 - 100% protein, vitamin and mineral package.

Granular mineral - Bio Range and Blueprint both over 100% organic (chelated) trace minerals for complete absorption, with no antagonistic effects
